Charge Pass

The most comprehensive and best value for money you can get

- ⚡ For free (no subscription or activation cost), only consumption is billed
- ⚡ Gives you access to one of the largest public charging networks in Europe, including Ionity (> 240.000 charge points in EU, > 9.500 charge points in BE).
- ⚡ Can also be used at home or work with connected chargers
- ⚡ Usage can be monitored through EDI Charging App for the user, and EDI Platform for the company.

Charge Pass | Additional (private) charge card via www.edi.be/charging-cards

The screenshot shows the EDI website header with the logo and navigation menu. The main content area features a large banner with a dark blue and green geometric background. A white rectangular box is centered on the banner, containing text in French and two buttons. The text reads: 'Accédez gratuitement à l'un des plus grands réseaux de recharge d'Europe grâce à la carte EDI'. The first button is dark blue with white text 'Obtenir une carte gratuitement', and the second button is white with a dark blue border and dark blue text 'Activer ma carte'. The background of the banner includes faint, tilted text elements like 'edi.b', 'EDI', and 'Charging Card'.

Geachte heer Cortvriend,

Uw factuur vindt u in de bijlage van deze e-mail. Het te ontvangen bedrag wordt binnen 4 weken op uw bankrekening bijgeschreven. Er geldt een termijn van 4 weken omdat de laadtransacties op uw oplaadpunten eerst geïnd moeten worden bij andere partijen.

U kunt uw facturen ook inzien en downloaden door in te loggen op uw persoonlijke webpagina op <https://edi.evc-net.com>. Tevens kunt u hier uw persoonlijke instellingen, zoals adres- en bankgegevens, wijzigen.

Heeft u geen wachtwoord, klik dan op [Wachtwoord vergeten](#) en u ontvangt een nieuw wachtwoord in uw mailbox.

Met vriendelijke groet,

EDI

****EXPERIENCE**** Do you still fear to travel with your electric car? Than you certainly should read further. Our colleague [Gaëtan Schoonbroodt](#) went on a 1 week road-trip across DK, SE and DE. 🇩🇪 He shared some great facts with us :

⚠️ First of all, start with a fully charged car before your roadtrip thanks to your EDI charging station ! 🔋

- 📍 total distance : 2200 km in 7 days 🇩🇪
- 📍 average consumption : 22.9kWh/100km ⚡
- 📍 20 charging sessions of which 13 in fast charge 🔌
- 📍 only 25 minutes on average spent on every fast charge ⌚
- 📍 3 fast charge sessions necessary to reach the destination (780km) => 1h15' standby in total perfect for lunch and coffee breaks ! ☕
- 📍 In DE, DK & SE, there are charging station almost at every corner ! Of course, it's always better to prepare your trip in advance. Don't forget to download the EDI Charging app. ABRP is also a good one to have.
- 📍 Cost: 0,65€/kWh average on DC fast charge, 0,51€/kWh on AC standard charge (Parking fee is usually even included in this price, which is very convenient). Charging at home is still the most affordable, but average cost when travelling is still ok.

📍📍📍 The EDI Charging card was compatible with all the charging stations on the way !

Even with 2 kids the travel was very enjoyable. Want to play a game? Count the many EV's you are seeing more and more when travelling. Especially on Scandinavian roads.

The question is : When are you going on a road trip with your EV? 🤔

Split-Billing

The background features several abstract geometric elements: a large light blue circle in the upper left, a large light green circle in the upper right, and a large light blue circle in the lower left. A network of dark blue and green circles connected by lines is visible. A small green rectangle is on the left, and a dark blue circle with a green lightning bolt is at the top right. The central text is surrounded by these elements.
